### **NEW TRAFFIC SIGNAL AT US HIGHWAY 77 AND CEDAR LANE ROAD**

Traffic Signals, Inc., the traffic signal subcontractor on the Cedar Lane Road widening project, will be removing existing traffic signal equipment at the US Highway 77 intersection with Cedar Lane Road and installing the new traffic signal equipment on Monday, April 20, 2015, weather permitting. After 9:00 A.M., work will begin on the installation and removal efforts. Work will be scheduled to maximize the time that the existing traffic signal is operational in order to minimize the downtime between the two systems controlling the intersection. However, during some periods of time, all movements through the intersection of US Highway 77 and Cedar Lane Road may be controlled by all-way STOP control as the contractor's crew works on the change-over. The new traffic signal is intended to the additional lanes provided by the Cedar Lane Road widening project.

Questions regarding the new traffic signal should be directed to Mr. David Riesland, City of Norman Traffic Engineer, at (405) 329-0528 or [David.Riesland@NormanOK.gov](mailto:David.Riesland@NormanOK.gov). Questions regarding the Cedar Lane Road widening project should be directed to Mr. John Clink, Capital Projects Manager, at (405) 307-7119 or [John.Clink@NormanOK.gov](mailto:John.Clink@NormanOK.gov).
